GitHub Readme Images Tutorial (screenshots in readmes)

- GitHub Readme Images
- Create an images/ or pictures/ folder in your root repo
- use relative paths to insert a markdown image

```

```

- GitHub doesn't support markdown image sizing but DOES allow the HTML img tag

```
img src="images/you-picture.png"
```

- Then you can add width and height attributes

```
img src="images/you-picture.png" width="100"
```

- Only specify 1 attribute to maintain the aspect ratio
